DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dan Sheridan on August 23, 2010.

Claims:

72. (Currently Amended) A ~~computerized system~~ non-transitory computer-readable media storing computer-executable instructions to:

receive multiple parameters including a negotiated currency exchange price and a first and second negotiated tolerance levels for an e-commerce transaction;

monitor a currency exchange spot price via a live pricing feed;

adjust the currency exchange price in real-time based on the monitored currency exchange spot price and the negotiated tolerance levels for a particular commerce participant, wherein the instructions to adjust include instructions to:

determine if the spot price exceeds at least one of the negotiated tolerance levels;

modify the negotiated tolerance levels based on the determination; and

re-calculate the currency exchange price using a predetermined equation based on the modified tolerance levels to determine the adjusted currency exchange price; and

allow the transaction to proceed with the adjusted currency exchange price.

Art Unit: 3691

73. (Currently Amended) A ~~computerized system~~ non-transitory computer-readable media as recited in claim 72, wherein the ~~linking~~ receiving the multiple parameters includes instructions ~~logic~~ for ~~linking~~ receiving one or more of: a sales price for a good or service of the e-commerce transaction; a current price for each of the multiple currencies; a cost for an exchange between two of the multiple currencies; a cost of credit to be extended to a buyer of the good or service; a sales risk of the e-commerce transaction; an amount of insurance to cover the sales price; a cost for the amount of insurance; and a shipping or handling cost.

74. (Currently Amended) A ~~computerized system~~ non-transitory computer-readable media as recited in claim 72, further includes instructions to: ~~comprising processing via the processor~~ one or more real-time feeds of changing input values, wherein each real-time feed provides a dynamic input value for calculating at least some of the multiple interrelated parameters.

75. (Currently Amended) A ~~computerized system~~ non-transitory computer-readable media as recited in claim 74, wherein the instructions to ~~processing via the processor~~ the one or more real-time feeds includes ~~logic~~ instructions for processing a feed of a dynamic input value selected from the list of dynamic input values: a fluctuating exchange factor between two of the multiple currencies; a fluctuating value of the good or service being transacted; a fluctuating spot price of one of the currencies; a renegotiable currency price; a fluctuating tolerance level for one of the parameters; a fluctuating creditworthiness ~~oldie~~ of a buyer; a fluctuating volume discount factor; a fluctuating buyer discount factor; a fluctuating time window for the e-commerce transaction; a

Art Unit: 3691

fluctuating sales volume history of the good or service; a fluctuating volume of business of ~~the~~ a buyer; a fluctuating competing bid; a fluctuating procurement cost of the good or service; a fluctuating risk associated with ~~the~~ a buyer or seller; a fluctuating payment history; a current type or designation of the good or service; and a fluctuating amount of collateral.

76. (Currently Amended) A ~~computerized system~~ non-transitory computer-readable media as recited in claim 75, further comprising iteratively re-calculating ~~via the processor~~ the multiple ~~interrelated~~ parameters a sufficient number of times to obtain a stable value within a threshold for each of the multiple interrelated parameters, in response to receiving a change in one of the dynamic input values.

78. (Cancelled)

Allowable Subject Matter

Claims 1-4, 64-67, 69-77 are allowed.

Examiner's Statement of Reason for allowance

The following is a statement of reasons for the indication of allowable subject matter:

The most relevant references are the *Pool* and *Szoc* references as discussed in the Final Office action mailed on May 11, 2009.

Art Unit: 3691

Pool and Szoc fail to teach a method (and corresponding system and non transitory computer readable media storing executable program instructions) comprising:

adjusting the currency exchange price in real-time based on the monitored currency exchange spot price and the negotiated tolerance levels for a particular commerce participant, wherein the instructions to adjust include instructions to:

determining if the spot price exceeds at least one of the negotiated tolerance levels;

modifying the negotiated tolerance levels based on the determination; and

re-calculating the currency exchange price using a predetermined equation based on the modified tolerance levels to determine the adjusted currency exchange price; and

allowing the transaction to proceed with the adjusted currency exchange price.

Updated searches revealed no references that disclosed the claimed invention, nor were any further references identified which could be reasonable combined with *Pool and Szoc*.

For this reason, claims 64, 72 and 77 are deemed to be allowable over prior art of record and claims 1-4, 65-67, 69-71 and 73-76 are allowed by dependency.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".

Art Unit: 3691
